

MMSI-S Silent Microphone Mute Switch

Fully Silent Popless Microphone ON/OFF Switch with Indicator LEDs

MMSI-S

The Alectro Systems MMSI-S turns any balanced Dynamic or Condenser microphone on and off **without producing a click or pop through your sound system**. The unit has XLR connectors for In and Out.

A Blue LED indicates that Power is present, and a Green LED indicates the microphone is turned ON. When the LEDs are not lit, they appear Clear. A switch is present to choose between the battery (not included) or the power supply (included).

The MMSI-S comes with a silent push button foot switch for use on the floor. The quiet nature of the switch itself makes it ideal for both live and recording purposes.

The device is housed in a rugged steel case, about 3.5"W x 4.875"L x 1.75"H. The MMSI is supplied with optional rubber feet, and a power supply as well.

FEATURES OF THE MMSI-S MICROPHONE ON/OFF SWITCH:

- Turns Microphone On and Off with no noise through speakers (Condenser or Dynamic Mics)
- Silent Switching Mechanism for clean recordings and silent operation during live use
- Rugged Steel Construction
- Can be easily mounted on a flat surface with velcro tape, or left portable
- Indicator LEDs for Power and Microphone ON
- LEDs are Clear when not lit
- Operates independently of phantom power via 9V battery or 9V power supply(included)
- XLR In and Out
- Made in Canada
