

Enforcer EAM10W & EAM35W 70 volt attenuators

The Enforcer EAM series are mono, 70 volt, 10 step audio attenuators with a true OFF position, for use in distributed sound systems.

Unlike “L” pad controls which become scratchy and burn out, this is an excellent quality volume control which provides a long life of reliable service.

The EAM10W is the 10 watt version and the EAM35W is the 35 watt version.

Both come with standard size ABS white face plates to fit standard single electrical junction boxes. Connections are made with screw terminals which accept up to 14 gauge wires.

Specifications:

	EAM10W	EAM35W
Power Handling	10 watts	35 watts
Frequency Response	35 Hz - 20 KHz	35 Hz - 20 KHz
Depth	1.60"	1.80"
Attenuator Steps	first 8 - 3db, last 2 - 6db	first 8 - 3db, last 2 - 6db
Insertion Loss	Less than 1 db	Less than 1 db
